From the center of Conegliano, of which the visit (Cathedral with works of Top from Conegliano and other famous painters, Room of the Beaten ones, houses at the street XX Settembre, the castle) is warmly recommended, the landscape assumes a pleasant homogeneity: the small inhabited areas, once essentially agricultural, they are alternated above all among fertile cultivated countries to vineyard (we are in the zone of production of the wines D.or.c. of the Piave). It is recommended to spend an evening in Portobuffolè - small medieval suburb been almost miraculously intact - and in Motta of Livenza, rich of buildings historical, but known above all in the Sanctuary of the Madonna of the Miracles, built in the 1513.

2nd stop

The medium course of the river Piave and the villas in the north-east of Treviso

Itinerary: Oderzo – Tempio – Ormelle – S. Michele di Piave – Maserada – S. Bartolomeo – Breda di Piave – Vascon - Treviso

Lenght: 70 km

Time: 4 hours and 30 minutes

Difficulty: easy

After having visited the historical center of Oderzo, the ancient Opitergium, important in the The century d.C. (to see first of all the civic Museum Eno Bellis, that picks up important archaeological finds and the Cathedral of Gothic forms) the tour turns at the end transiting for another zone typical of the Treviso area, that of the Piave. Along his course it is possible to cross

pleasant paths in mean to a roadstead vegetation of brushwood, that constitutes easy deviations in the economy of this excursion. The last line of the itinerary offers the possibility to admire from the outside numerous Venetian villas that rise to northeast of the chief town. This Tour, that we wish will result pleasant, is not able whether to end with the visit to the city of Treviso, chief town of the province rich in art, history and famous monuments.
